In_Visible As It Should Be Artist's Statement

what

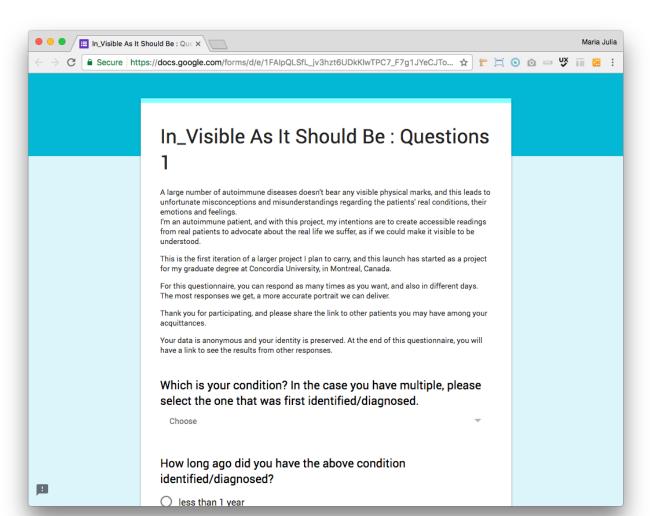

Interactive visualization to represent the emotions of a good day or a bad day from people that carry invisible illnesses.

why

People suffering such conditions, besides the consequences of the illnesses themselves, have to struggle on a daily basis with disbelief and disrespect regarding their situation. Those people turn themselves more and more muffled anonymous voices.

For this project, patients were invited and offered an open space to declare how they face the day, because every day is a sick day.
